

Vision has added even more value to VisionInsuresafe

VisionInsuresafe is an Online Health & Safety Risk Management System for small & medium sized businesses and is made available through Vision Brokers. Brokers can market the Product either on a standalone basis or as part of an insurance package. Vision also provides Client marketing leaflets upon request.

New for 2006

Business Continuity and Document Manager have been added to www.visioninsuresafe.com , providing even more value.

What do we mean by Business Continuity?

Primarily, a management process that identifies potential threats that will impact on a business' ability to provide its customers with its products or services and the actions needed to ensure the immediate future following any major disruption.

Furthermore, a business needs to be able to demonstrate that it is able to meet its service levels and will cope with disasters competently because it has planned to do so.

Who might be affected?

Staff, customers, suppliers, customers' customers and insurers are likely to be among those who will rely on your assurances of competency. In order to meet these assurances planning is imperative.

What Risks?

Fire, Flood, Power Failure, Strikes, Severe Weather, Plant Failure, Illness, Data Loss, Fraud, Vermin, Computer Viruses, HSE Prohibition Notice, Premises Structural Problems; these are just some of the risks that any business might face.

Expect the Unexpected.

Nearly 1 in 5 businesses suffers a major disruption every year - Yours could be next. With no recovery plan, you have less chance of survival.

With this in mind we have provided a step-by-step process to develop a comprehensive, sustainable and adaptable plan. We have divided the process into "bite sized sections" because it may be a big task but once you have carried out the component parts you will be well prepared for most eventualities

Document Management

The VisionInsureSafe online safety advisor service has been improved by the addition of a Document Management Facility.

Users or their consultants will simply be able to "upload" and record their completed Safety management documentation (Policy, Risk Assessments, etc), and access them at any time.

This will enhance the ability of users to provide risk information more readily to their insurance partners.

Significantly, the market for the service will be wider, for reasons of low cost and ease of use. Larger and multiple site operations in particular (e.g. franchises, retail chains etc) will find the service more acceptable.

There is no extra charge for these improvements – ensuring VisionInsureSafe remains the most effective, low cost safety management tool in the UK.

Clients, who chose to, can also file their Business Continuity Plan documents can also be recorded on-line thus avoiding the calamity of not having the plan available at anytime.

Vision also provides hands-on consultancy support. Full details are available within the Vision Online log-in zone www.visionunderwriting.com
